Continuation of 11. does NOT place the application in condition for allowance because: The arguments rely on the evidence submitted in the for of a declaration by Andreas Kordikowski. This declaration is deficient. With respect to item 5 in the declaration, the declaration states that it is not possible to accurately determine the degree of crystalinity from XRPD data. Therefore, the statements regarding the estimated crystalinity in the prior art (the '221 document) are deemed to be a matter of opinion, with no factually basis. It is noted that two diagrams were submitted as an Appendix to the declaration as factual evidence to support the opinion. However, these diagrams are defective in that it is impossible to determine which plot on the graph corresponds to the amorphous, crystaline, and semi-crystaline forms described in the diagrams's legends. With regard to item 6 of the declaration, this is also deemed to be a matter of opinion, with no factual basis. There is no discussion of the scientific or technical reasoning that gives rise the the opinion presented therein. Since the declaration is defective for the reasons discussed above, Applicants' arguments, which rely on the statements made in the declaration, cannot be deemed persuasive.
